

Explanation of the Akashic Records

The Akashic Records are the individual records of a soul from the time it leaves the Source Father/Mother's house until it returns.

At the time we make the decision to experience life as an independent soul, there is a field of energy created to record every thought, word, emotion and action generated by that experience. That field of energy is the Akashic Records.

Akashic, because it is composed of Akasha (the energetic substance from which all life is formed) and Records, because its objective is to record all life experience.

By opening the Akashic Records with a sacred prayer, we align ourselves to the vibration of the one receiving the reading (either ourselves or another). The prayer works with energetic vibration to "key in" to the specific name of the life form, and carries with it God's protection through Masters, teachers and loved ones.

The information in the Akashic Records helps us bring our past and future present in our now. By accessing the Akashic Records, we can identify and release anything that we have created that has become a block to our present realization of our oneness with God.

We can look at why we have addictive patterns, why we choose the relationships we do, why we have created our habitual responses, and how to create action in our lives instead of re-action.

The healing energy of the Akashic Records allows us the freedom to choose grace in all things; therefore, overriding any illusion we have created that causes us to believe we are separate from God/Spirit/Source.

It is one of the most powerful tools available on the planet today to help us remember our oneness with God/Spirit/Source.

You must take responsibility for the path you choose to walk.
- ✓ At times, some information is blocked from being shown as we might not be ready to receive such information or it may hinder learnings of issues you may still be going through. More may be revealed at a later time.
- ✓ Bring a sound recording device to record any information you receive. You may want to listen back over the information you receive.
